

## 3M 9105 N95 VFlex Respirator

### Description

This disposable N95 particulate respirator is designed to help provide quality, reliable worker respiratory protection for certain non oil based particles. It has a unique folded design with 3M proprietary filter media and V-shaped pleats that expand for ease of breathing. In addition, the V-shaped pleats flex with mouth movement while talking. The respirator features uniquely designed tabs for positioning the respirator on the face, and an embossed front panel to help the respirator retain its shape.

### Features

- 3M proprietary filter media and V-shaped designed for ease of breathing
