

AUWELD 301-10M-OX Heavy Duty O² Regulator

Description

These regulators are designed to provide you with excellent performance, and are robust, durable and safe. The tested regulator is protected by a fully encapsulated filter. The zinc die-cast valve cover is protected by double-layer powder coating to ensure corrosion resistance in corrosive environments. The single-stage regulator has designed for medium to heavy duty gas welding, cutting, and heating application.

Specification

Model	301-10M-OX
Gas	He/Ar/N ₂ /O ₂
Pressure Inlet Gauge	0-1000 PSI
Max Delivery Pressure	200 PSI
Working Pressure	0 - 10 Bar
Inlet Connection	CGA 580

Features

- **Product Material** : Body and housing cap are machined from class “A” brass bar stock, sintered bronze inlet filter, chrome plated housing cap

- **Characteristics** : 1-1/2" diaphragm, single stage construction, stem type seat assembly for more reliable seating , with safety relief valve for safe operation
- **Applications** : It can apply to in industrial and laboratory applications, non-corrosive gases, hydrocarbon service.
